Gabe Hollifield – Web Development Intern

West Sacramento, CA | (210) 584-0879 | gholl467@gmail.com | github.com/gabholli | linkedin.com/in/gabe-hollifield | Personal Website: gabholli.github.io

Skills

Software development standards - Source, version control: GitHub - Object-Oriented Programming - HTML5 - CSS3 - React

Work Experience

Web Development Intern, MindHome, West Sacramento, CA **05/2023 – Present**

- Manage website updates for MindHome, instituting assigned changes to over 25% of total content, collaborating with design team to improve visual appeal, overall user experience
- Deploy alterations of web pages through use of Builder.io, specifically including insertion of CSS, HTML code at least 25% of time
- Facilitate weekly cadence of user story presentations to senior leadership, showcasing recent achievements, upcoming goals, increasing visibility of team's impact by 50%

Academic Projects

JavaFX Appointment Scheduling System

- Plotted local desktop application for scheduling appointments, maintaining customer records from ground up, based broadly on View-Model-Controller pattern, containing 6 packages
- Incorporated Java with JavaFX libraries, MySQL connector driver to process functionality for desktop graphical user interface with locally hosted database of 6 tables
- Finalized program using only 25% of projected code needed with actual Java written limited to below 2,000 lines, auto-generated code totaling about 13,000

Student Scheduler Mobile App

- Computed in Java, Room database framework with fewer than 2,000 lines to keep track of simulated terms, courses, assessments for students
- Assembled program composed of 8 screens, associated entity, adapter files
- Structured each screen with differing content including buttons, text fields for data entry, lists for deleting, adding to 3 different entities

Inventory Management System

- Produced Java-based inventory management system designed to keep track of products, parts within 2 main tables, 5 separate sections, shown within simple graphical user interface
- Conceptualized value of inheritance by creating main abstract parts class, 2 derived sub-classes

Student Roster

- Programmed in C++ hypothetical school student roster based on array of 5 students, narrowed down into 6 sections with varying amounts of information
- Gained proficiency in object-oriented programming by implementing 3 header files with corresponding content

Education

Western Governors University **07/2022**

Bachelor of Science in Software Development

Coursework: Data Structures, Algorithms, Software Engineering, Software Quality Assurance, Web Development Applications

San Antonio College **05/2012**

Associate of Arts in Liberal Arts

Coursework: English Composition, Liberal Arts Math, US History, Kinesiology, Classical Literature

Certifications

CompTIA A+ - CompTIA Project+ - ITIL Foundation
