a

## Work Experience

**MindHome, West Sacramento, CA**

**Web Developer**

**08/2024 - Present**

**Web Development Intern**

**05/2023 – 08/2024**

- Manage strategic changes across MindHome's platform that revamp over 25% of total web content, utilizing advanced coding with HTML5, CSS3, and JavaScript for optimal performance
- Orchestrate seamless migration of assets including images and descriptions across more than 10+ product pages
- Facilitate weekly cadence of user story presentations to senior leadership, showcasing recent achievements and upcoming goals, increasing visibility of team's impact by 50%

## Projects

### Dog Breed Information Website

- Plotted dog information website using Next.js, Tailwind CSS; and TypeScript, created individual pages for 172 breeds, resulting in comprehensive and user-friendly browsing experience for dog enthusiasts
- Leveraged JavaScript to craft user-friendly breed list with pagination across 15 pages, streamlining content accessibility and enabling efficient browsing for users
- Produced 1 table containing flexible number of rows and columns using Tailwind utility classes for each breed

### E-Commerce Website

- Coded and launched robust e-commerce platform using React.js, React Router 7, and Tailwind CSS, showcasing over 30 potential products
- Deployed login feature utilizing RESTful API for authentication, with 1 set of test credentials provided, possibly enhancing system security against unauthorized access attempts
- Devised implementation of link state functionality for efficient sorting of 4 item categories, to improve user engagement on digital platform

### Food Recipe Website

- Implemented 3 main pages and intuitive search functionality for effortless navigation, enhancing user engagement
- Employed React Router 7 to create efficient routing paths, facilitating smooth transitions between pages and ensuring seamless user journey
- Engineered feature enabling users to explore randomly generated meal options, pointing to 1 randomly generated meal at once retrieved using API call

## Education

**Western Governors University**

**07/2022**

*Bachelor of Science in Software Development*

Coursework: Data Structures, Algorithms, Software Engineering, Software Quality Assurance, Web Development Applications

**San Antonio College**

**05/2012**

*Associate of Arts in Liberal Arts*

Coursework: English Composition, Liberal Arts Math, US History, Kinesiology, Classical Literature

## Certifications

CompTIA Project+
