Tools & Platforms: Shopify, Builder.io, Figma, Web Content Management Systems, Netlify, Render

Work Experience

MindHome, West Sacramento, CA
Web Developer **08/2024 - Present**

- Optimize user interfaces using HTML and CSS across Shopify and Builder.io environments, implementing 8+ strategic UI updates to elevate overall user experience
- Improve UI consistency across 25% of company website using Builder.io, aligning components with updated brand standards
- Build and style responsive web content across 3 screen sizes using HTML, CSS, Shopify and Builder.io
- Update and style content on at least 8 company pages using Shopify and Builder.io

Web Development Intern **05/2023 - 08/2024**

- Developed 10+ reusable web components aligned with design system and brand guidelines
- Transformed 4+ Figma mockups into fully responsive, production-ready HTML/CSS code, improving user experience
- Customized 4+ Shopify store templates using Liquid, HTML, and CSS, extending platform functionality beyond default theme capabilities
- Collaborated with fellow team members and adopted team development standards, improving at least 7 different website pages

Projects

Stock Pulse | React Router 7, MongoDB, Node.js, Express | github.com/gabholli/stock-market-website

- Built server-side API proxy with caching (node-cache) to reduce external requests and secure API keys
- Created interactive dashboard for stock search, price history visualization via Recharts, and user-specific watchlists
- Designed session-based authentication and MongoDB schema for user data and persistence
- ***Live demo:*** *https://market-website.netlify.app*

Recipe Repository | React, React Router 7, Tailwind, Supabase | github.com/gabholli/recipe-site

- Engineered full-stack recipe application with user authentication and database-backed favorites system using PostgreSQL
- Integrated external meal API with custom favorites management, implementing CRUD operations
- Established progressive authentication flow, allowing users to browse freely, optionally authenticate to save recipes permanently
- Designed responsive UI with optimistic updates, error boundaries, and comprehensive loading states
- ***Live demo:*** *https://gabholli-recipe-site.netlify.app*

Education

Western Governors University **07/2022**
Bachelor of Science in Software Development
